Nguyễn Thoại

Front-end Developer

0329097454 nvmthoai12@gmail.com https://github.com/nvmthoai Long Thạnh Mỹ, Thành Phố Thủ Đức 06/01/2004

OBJECTIVE

A skilled and passionate Front-end Developer with extensive experience in ReactJS and VueJS, building scalable, high-performance, and responsive web applications. Adept at modern front-end architectures, API integration, UI/UX design, and cross-functional team collaboration. Seeking to leverage my technical and leadership abilities to create impactful digital experiences.

EDUCATION

FPT University *2022 - 2026*

Software Engineering

GPA: 3/4

ACTIVITIES

Project: Koi Care System *May 2022 - November 2024*

Front-end & Mobile

Description: Developed a web application for managing koi ponds, fish, water parameters, and related products.
Technologies: ReactJS, TailwindCSS, Material UI, Spring Boot, MySQL, MongoDB, WebSocket
Key Features:

- Built CRUD modules for pond, fish, water parameters, and products
- Implemented authentication system (login/register)
- Developed product listing with filtering and search
- Integrated payment workflow for orders
- Implemented real-time updates using WebSocket

Project: https://github.com/nvmthoai/Koi_Care_System
Demo: https://koi-care-system.vercel.app

Project: Health Care System November 2024 - April 2025

Front-end & Mobile

Description:
Developed a healthcare platform focused on **women's sexual and reproductive health**, enabling users to track health information, access services, and manage personal health data through both web and mobile applications.
Technologies:
ReactJS, TypeScript, React Native, RESTful API, TailwindCSS, NativeWind
Key Features:

- Developed **health profile management** for personal medical and reproductive health data
- Built **menstrual cycle and health tracking features**
- Implemented **secure authentication system** (login/register)
- Integrated **RESTful APIs** to manage user health data and services
- Designed **responsive UI for web and mobile platforms**
- Implemented product/service listing with filtering and ordering functionality

Project: ClosetShare -

Front-end

- Developed a fashion community platform that allows users to **store virtual wardrobes, share outfits, and buy/sell or rent clothing items**.

- Implemented an **AI-powered outfit recommendation system** that suggests clothing combinations based on users' wardrobe items and style preferences.
- Designed social features including **outfit sharing, user profiles, and community interaction**.
- Promotes **sustainable fashion** by extending the lifecycle of clothing through sharing and resale.
- Technologies: **NextJs/ React Native, REST APIs, AI-based recommendation logic**.

Demo: https://closetshare.vercel.app

Project: ChargeX – EV Battery Marketplace & Auction Platform -

FullStack

Description:
Developed a platform for **buying, selling, and auctioning used electric vehicle batteries**, integrated with a digital wallet payment system.
Technologies:
ReactJS (TypeScript), React Native, NestJS, PostgreSQL, PayOS, GitHub Actions, Vercel, VPS
Key Features:

- Developed **web and mobile interfaces** using ReactJS (TypeScript) and React Native
- Built backend services with **NestJS and PostgreSQL** for managing users, battery listings, auctions, and transactions
- Implemented **auction system** allowing users to bid on used EV batteries in real time
- Integrated **PayOS digital wallet payment system** for secure transaction processing
- Designed **RESTful APIs** for marketplace operations and user management
- Deployed web application using **Vercel and VPS infrastructure**
- Implemented **CI/CD pipeline with GitHub Actions** for automated build and deployment

WORK EXPERIENCE

FPT SOFTWARE ACADEMY November 2024 - April 2025

Front-end

Participated in software development training focused on **full-stack web development and modern development practices**
Developed web using **ReactJS, TypeScript, React Native, and RESTful APIs**
Implemented **CRUD features, authentication systems, and API integrations** for practice projects
Collaborated in team-based projects using **Git for version control and Agile development workflow**
Improved problem-solving and debugging skills through real-world development exercises
Practiced writing clean, maintainable code following **software engineering best practices**

SKILLS

Frontend :	ReactJS Next.js Vue.js **css, javascript, html** TailwindCSS, Bootstrap, Material UI
Mobile Development	React Native
Backend	NestJS, NodeJs RESTful API Development
Tools & Technologies	Git, GitHub Postman Figma
Database:	-MySQL, MongoDB, Postgre
DevOps / Deployment	GitHub Actions (CI/CD) VPS Deployment Vercel

INTERESTS

- Ability to learn quickly, adapt well, have a high spirit of initiative and responsibility at work.
- Working group

ADDITIONAL INFORMATION

-Strengths: Front-end technology and web application development - Proficient in HTML, CSS, JavaScript
- Proficient in JavaScript, including TypeScript and JavaScript objects
- Deep understanding of React.js and VueJS its scoring principles
- Familiar with the newer specifications of ECMASCRIPT
- Proficient use of the source code management tools: GIT
- Ability to learn and apply new technology quickly
- Experienced in web design using various libraries and frameworks, including React.js, VueJS, NuxtJS, MUI, Tailwind CSS, and more.
- Adaptable and flexible in using different tools and technologies to meet project requirements and client expectations.
